(ADM Czernin, ADM Lincoln, ADM Pura Foods***, ADM Quincy, ADM SIO, ADM Valdosta) Palm Oil Supply Chain Traceability January - December 2023

Overall Traceability

Volume Sourced by Region of Origin

The charts below represent total volumes of palm and palm kernel products sourced from various origins into ADM globally.

*Traceable to Plantation: self-reported information from suppliers that has not been verified **Local: products sourced directly from refineries in Europe and USA *** Does not include traceability information for feed products

NDPE Implementation Reporting Framework

January – December 2023

The NDPE Implementation Reporting Framework is a reporting tool designed to help supply chain companies understand and track the progress achieved in terms of implementing commitments for No-Deforestation and No-Peat. It is a stepwise reporting framework which captures a set of requirements for falling under one of the 5 categories.

For more information on the NDPE Implementation Reporting Framework, please see this website.

Verification methodology Traceability

- 1) A sample equal to the square root of the total number of mills in the origin country was taken based on a risk-based approach including the following variables: volumes delivered, location, origin refineries.
- 2) Reported traceability figures by ADM for all the refineries included in the scope were reviewed by cross checking information for the mills selected for the sample and delivering to a specific refinery. The traceability data is collected from suppliers' public traceability dashboards, or directly consulting with their suppliers.
- 3) Control Union's responsibility was to exclusively verify the accurateness and completeness of the information as received by ADM, and ADM methodology and processes for the calculation of the traceability scores for the facilities included in the scope.

Summary of the methodology & Conclusion

The verification was conducted based on NDPE IRF Verification Protocol Version Nov 2020 (version 5.8) through remote verification. For verification purpose, verifiers have selected samples as per the sampling methodology stated in the protocol and only the volumes sourced by ADM's facilities in 2023 have been taken into account. Control Union's responsibility was to exclusively verify the accurateness and completeness of the IRF methodology and processes for the calculation of the IRF profiles for the facilities in the scope as presented by ADM. Based on the information and evidence presented to Control Union, ADM as the data aggregator has been verified and found compliant with the methodology detailed in the NDPE Data Verification Protocol Version November 2020.
